Perfect lighting for modern working – WBS.LEGAL uses LUCTRA® VITAWORK®

Iserlohn/Cologne, 03.12.2024: The renowned law firm WBS.LEGAL, which specialises in media, e-commerce and internet law, has recently relocated to new premises in the Ovum building in Cologne Braunsfeld. The spacious 1,400 m² office features a modern, open-plan interior design concept that focuses on flexible working and employee well-being. In addition to ergonomic furniture, the perfect workplace lighting also plays a key role, which is why the company has chosen the LUCTRA® VITAWORK® floor lamp to meet these needs.

Design meets functionality

The Ovum building features an impressive red brick façade, which is complemented on the inside by black design elements such as window and table frames. With their clear, classic design, the LUCTRA® VITAWORK® lamps blend seamlessly into this design environment. Their elegant appearance and the choice of black, white and aluminium make them a highlight – in every sense of the word! – when it comes to modern office design.

Ideal lighting for every working environment

The VITAWORK® floor lamps combine direct and indirect illumination, providing not only efficient, standard-compliant lighting, but also creating a comfortable, natural sense of space without any harsh shadows. With light intensities of 7,000, 12,000 or 17,000 lumens, VITAWORK® covers all the requirements of open-plan offices and individual workstations.

The lighting solution also features impressive, user-friendly controls. Both the direct and indirect light can be individually controlled via the integrated control panel. Alternatively, a system of presence and light sensors automatically adjusts the lighting to the ambient light, optimising energy consumption and increasing comfort.

Focusing on sustainability

Besides functionality and design, VITAWORK® is also a master of sustainability. The lamp is made from recycled materials, making it ideal for use in a contemporary office setting that prioritises both productivity and the environment.

Flexible, feel-good worlds of work

With its new office, WBS.LEGAL is setting an example for modern working. By combining aesthetic design, optimal lighting quality and sustainability, the company is creating an environment that takes into account the individual needs of its employees while perfectly supporting mobile working structures.

About LUCTRA®:

LUCTRA® is the brand for good working light in the office or at home. For this purpose, the table, floor and mobile lamps included in the range provide light which not only illuminates, but also makes people happy, more efficient and simultaneously less tired. This works, because it transmits the right impulses for every situation.

To accomplish this, the professional, biologically effective LED lamp system takes advantage of the latest scientific findings on the effect of light on human beings. It follows the principle of Human Centric Lighting, HCL for short, by focusing on people's personal lighting needs for healthier and more efficient working and living. LUCTRA® light can almost perfectly simulate natural daylight and thus supports the user's personal inner clock.

LUCTRA® has already received numerous renowned design prizes such as the German Design Award and was brought to market in 2015 by the long-established company DURABLE Hunke & Jochheim GmbH & Co. KG. This company has been dedicated to professional work for almost a century: to its organisation, its processes and its equipment. DURABLE currently employs 700 workers worldwide and has its Head Office in Iserlohn/Germany.
